ASPECT
PRODUCT OVERVIEW
The workplace is changing. Offices and commercial spaces are beginning to take on a fresh approach to the generic work environment. It is less about dividing space and more about open plan interiors that are playful and collaborative, with a focus on expressing a sense of character and individuality.

Pod evolution has come a long way. Originally introduced to enhance and support breakout space, pods have become rooms in their own right, creating an area where creativity and innovation takes place. Having long been used as a place to hold meetings that require a measure of privacy, pods are now being used in a very different way. Other concepts are popping up to break up the monotony of the ‘regular’ open-plan office layout.

We are seeing a new wave of modern pod that breaks away from the typical typology, helping promote a more collaborative and healthier work environment. Subsequently, this means happier employees with less time absent from work. With society moving away from the tradition of the personal desk, our pods provide a designated shelter for staff to physically and intentionally carry out a task that requires some ‘me’ space. It can improve an individual’s concentration, safety and efficiency in workplaces or educational environments.
Introducing Aspect

Aspect responds to the current market need for enclosed yet collaborative spaces within today's workplace and educational environments. Its multifunctional properties provide an area for individual headspace, collaborative meetings and also supports more private interaction.

With these new workplace environments continually growing in popularity, Boss Design have created pod systems that offer enhanced user experience. Our focus is to provide optimum space in terms of comfort while still retaining the flexibility that standard pods offer.

With this in mind, we have spent considerable time working on how this can be achieved. We have thought about lighting and air quality as well as sound and visual privacy. Creating a space that can be customised using textures, colour and creative lighting to provide a work area that has personality and a sense of place.
1. Aspect has 8mm thick glass panels with a 10mm sliding door for increased levels of soundproofing/speech privacy.

2. The introduction of frameless glass panels gives a seamless finish.

3. ‘Select the Weather’ Human Centric Lighting promotes a person’s well-being, mood and health.

4. Ceilings include larger quadrant fabric wrapped tiles, giving a cleaner aesthetic.

5. Aluminium crown as standard, reducing the visible impact of the ceiling mounted airflow unit.
6. Improved ventilation outlet providing increased airflow into the pod.

7. UK industry leading acoustic performance, with up to 37dB.

8. Optional selection of decorative claddings including plain & grooved wood, cork and faux concretes.

10. Lockable door options available.
Listen, Hear.

Noise problems and acoustics can affect many individuals’ working conditions within the workplace and also the surrounding areas.

Often those quiet moments and one-to-one meetings, are affected by the background noise being ‘too loud’. Aspect, and its UK market-leading acoustics, has been designed to give the user optimal privacy and noise control.

1 Aspect provides an advanced acoustic solution with an impressive noise suppression rating of 37dB – superior to other models available on the market.

2 Good acoustic management is about the balance between sound reflection and sound absorption.

3 Aspect pods have a carefully considered blend of hard, sound reflecting surfaces and soft, sound absorbing surfaces.
The performance and efficiency of staff is shown to improve in environments where the impact of the acoustic environment on speech privacy has been considered.

A lack of speech privacy creates distraction for employees. Managing the passage of sound through reflection and absorption can make the working area more productive.

Aspect’s acoustic wall and ceiling panels contain a sound absorbent material that reduces reverberation by absorbing the sound waves, making speech clarity within the pod much clearer.

With a more private and quiet environment, the reduced sound levels make the user experience more comfortable.

A lack of speech privacy creates distraction for employees. Managing the passage of sound through reflection and absorption can make the working area more productive.
Select the Weather

Simple, innovative lighting control.

With employee welfare fast becoming a greater focus within the workplace, surrounding attributes including lighting and temperature all contribute towards health and wellbeing. Lighting devoted to enhancing vision and comfort promotes an individual’s happiness, mood and health.

Human Centric Lighting is the means by which the emotional wellbeing, comfort and productivity of individuals can be improved simply through the correct control of the lighting in place.

The main benefits are that it can improve concentration, safety and efficiency in workplaces or educational environments. Created by changing the colour and intensity of white light, the natural circadian rhythm of a person can be supported by using warmer (relaxing) light with lower intensity in the morning and evening, and cooler (energising) light during a typical working day.

Select the Weather (STW) lighting, which incorporates Human Centric Lighting, is the perfect accompaniment to the pod. Available within any of the pods in the Aspect range, STW is a simple yet innovative lighting solution using the latest LED control technologies and Human Centric Lighting.

With four pre-set scenes - Calm Down, Energise, Concentrate and Stay Alert - you have the ability to set the scene. Warmer white light with slightly lower intensity helps users calm down when facing high stress. Cooler white light with higher intensity helps users become more energised. For example in the early morning when facing high stress, warmer white light may be used.
Calm Down
- High Stress Period
  - Warm Colour
  - 80% Light

Energise
- Early Morning
  - Cool Colour
  - 100% Light

Concentrate
- Thinking / Presentations
  - Intermediate Colour
  - 50% Light

Stay Alert
- Normal Daily Work
  - Naturally Changing Colour
  - 90% Light
Aspect Specification
Aspect 1

Features

Standard
- Horizontal LED lighting system
- Acoustic fully upholstered 1500mm walls – Camira Lucia as standard
- 8mm frameless toughened clear glass 2007mm walls featuring two levels of DDA compliant line manifestations
- 1 x Power arch with 1 x Cat6 power & data panel (2 power 2 data)
- Acoustic ceiling panels upholstered in Camira Nexus Pewter
- 1 x 8mm pivoting clear glass door to include 2 levels of DDA compliant manifestations
- 1 x Active PIR motion/occupancy sensor (passive infrared)
- 35mm Satin Silver anodised Aluminium frame
- 100mm high Aluminium extrusion crown as standard

Dimensions
2275mm high x 1500mm length x 2007mm width
This unique free-standing system provides the perfect break-out space for employees to rest and escape from a busy work environment. Whether working in solitude or focusing on a concentrated task, Aspect 1 affords the intimacy and privacy that is vital for today’s modern methods of working.

Add Ons

• Select the Weather - Fully controllable Human Centric Lighting system
• Sliding door option is available on the Aspect 1 pod
• Lockable door at handles height available on pivot doors
• Textured effects – cork, concrete, wooden cladding, rust
• AV column and TV bracket
• Powder coated finish
• Neonist lighting
• LED light panel
• LED light strips
• White MFC workstation with support legs, available on the Workhub upgrade

User Experience

Aspect is designed to provide the optimum user experience incorporating these features.

Human Centric Lighting
The natural circadian rhythm of a person can be supported by using ‘Select the Weather’ Human Centric Lighting. Proven to improve concentration, safety and efficiency, the lighting feature contributes towards health and wellbeing.

LED Luminaire Lighting System
Aspect offers horizontal LED luminaire lighting as standard, creating a more even distribution of light unlike other spotlight offerings. LED’s are unlike standard lighting - they are a longer lasting product being a far more energy efficient option.
Lockable Door Handle
We understand the need for safety and security within any environment. The Aspect pod offers the option of a lockable door handle within the pod. (This will only be available on pods with a pivot door.)

AV Column
AV allows technology to be easily integrated into the pod. This column includes a bracket for mounting a media screen and AV sockets, each clearly labelled with their function. Standard configuration is 2 x power, 2 x VGA and 2 x HDMI sockets, and bespoke options can also be specified, e.g. USB, Cat6 data, DVI. The AV sockets provide a seamless link to the media screen, rather than untidy trailing cables.

Seamless Glass Panels
Another aesthetically pleasing addition to Aspect is the introduction of seamless glass panels. These create a more discreet and clean visual. Being 960mm wide, 8mm thick, the seamless glass panels create a clean outlook with minimal aluminium extrusions.

Air Vent Grill
A ceiling-mounted ultra-quiet fan unit. CO² build up has been shown to be a key factor in increasing tiredness and reducing concentration in the workplace. Airflow from the surrounding environment is channelled into the pod through a laser cut acrylic panel with a grill that maximises air distribution. Fresh air is circulated into the pod and CO² is expelled, creating a comfortable working environment.
Personalise your Pod

No one pod needs to look the same. One of the unique features of Aspect is its ability to customise the look and feel of the pod to suit its environment. This can be achieved by using a mixture of textures, contrasting high-end smooth finishes with rough, natural materials, as well as incorporating neonist signage and light panels to enhance brand awareness.

Finishes with inherent acoustic properties are no longer dull or limited. Sustainable materials such as wood, wool and cork have made a comeback, adding to the mix of textures available. The use of longer pile fabrics combined with polished hard surfaces such as glass, solid surfaces or stone is the way forward, with upholstery being the key to adding softness.

Room Booking

Evoko Liso
Meeting intelligence starts with hassle free bookings – the next generation Room Manager. Evoko Room Manager has taken the hassle out of room bookings. No more double bookings, confusion or interrupted meetings, the Evoko Liso makes sure all your meeting rooms are being used in a truly effective way. Working with your everyday WiFi, it is simple to use with no extra plug-ins or additional software to learn. All features can be reached with only a few simple touches.

Evoko Minto
Aspect welcomes Evoko Minto, the new era of phone conferencing as part of the pods’ optional features. It is intelligent and easy to use, being compatible with almost any technical device. Features include advanced patented sound software and sound-improving speakers, enhancing the clarity of the human voice. The halo light feature is perfect for when you don’t want to be heard. Again being easy to use; just swipe your hand in the air over the top. The Halo Light instantly turns red and the microphones are muted so that you can speak freely. A great accessory for any meeting room.
RAL

These are a small selection of the RAL colours available.

Boss Design warrant the original purchaser of an Aspect pod system from the date of delivery.

A five year warranty covers all structural elements of the Aspect pod and is subject to normal conditions of use and care. The structural guarantee includes items such as integral structural fixings, aluminium profile frame, toughened glass, ceiling construction, and is only valid if the Aspect pod has been assembled or re-assembled by a Boss Design approved installer - otherwise the warranty is invalid.

Aspect offers a two year warranty on all moving parts to include the door and airflow unit.

Consumables e.g. LED light bulbs and LED drivers may be purchased through the Boss Design customer services department on 01384 454709.
