# Agent Table Power & Data Locations

The Agent table range is compatible with a wide range of power and data units, however not every power and data unit can be used in all areas of the table. To help make specification easier for you, we have divided the tables up into color coded zones in which the listed power and data units can be

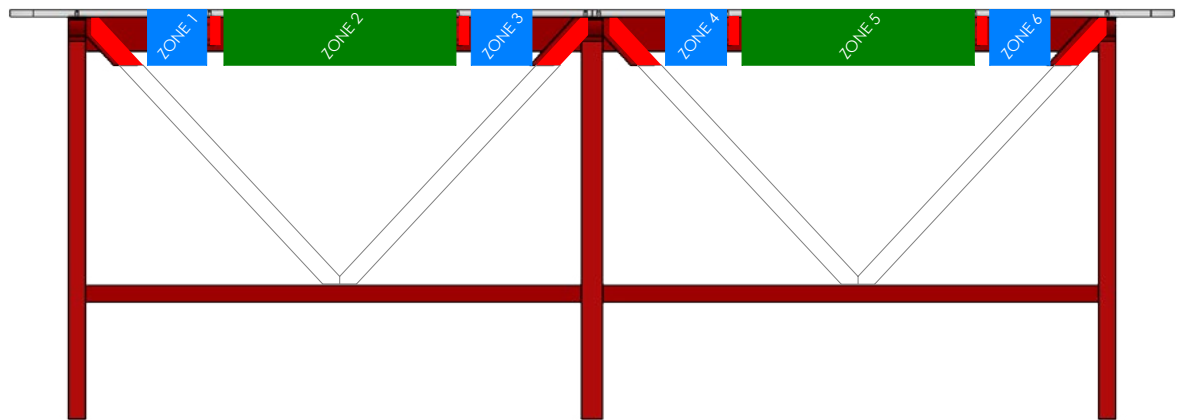

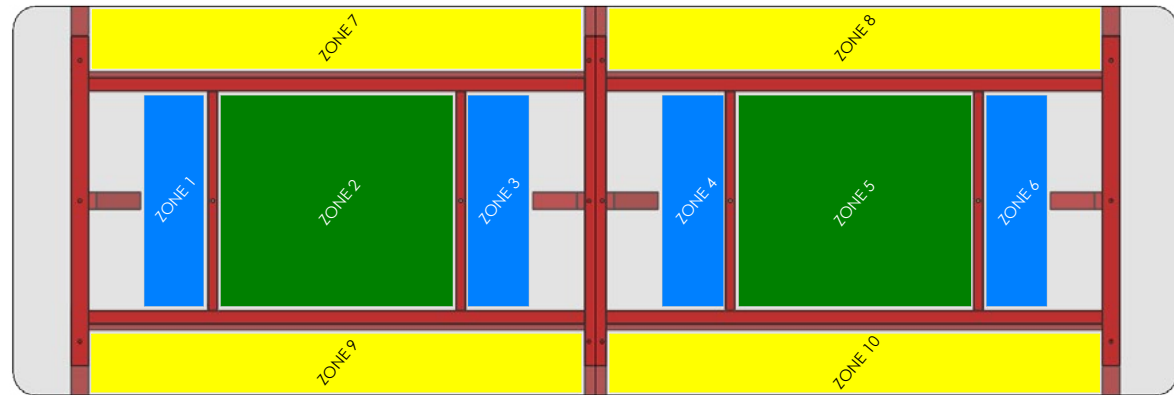

placed. Please note, the cross beams of the High Table may impede slightly on placement within zones 1,3,4 & 6 (blue) depending on what size of table you specify.
